CAUSE OF ACTION 3

On 05/16/2026 at 6:25 AM while in my car at East Fork, San Gabriel, CA, in another incident at this location I captured similar RF weapon evidence but this time also using a Gauss Meter that measures electric and magnetic field placed next to the RF meters and the Gauss meter did not react but the RF detection meters did. The SAS RF Pro II Meter has intermittent readings because bluetooth was left on on my phone, howerver the Narda Radman XT registers a blink when an audio clicking sound is heard. The ME 3030B M/E Analyzer (16 Hz - 2000 Hz) reads steady with no reaction. The Plaintiff argues this is direct evidence pointing to an RF/Microwave weapon being used to cause the clicking noises or pulses during a DEW attack and possibly Active Denial. Similar evidence using RF Meters and a Gauss Meter was gathered on 3/13/2026 in Tuscon, Arizona. At the time I was working on my lawsuit using my laptop. This got a strong directed energy attack to try and prevent me from working on my lawsuit violating my rights.

This is a violation of the 1st, Fourth, Fifth, 8th, 14th and also 18 U.S.C § 242, Bivens Action; if Jane and John Doe at the FBI-JTTF, DHS, or “ borrowed servant ” contractor is invloved. 18 U.S.C. § 241 and injunction if abusive contractor.
